

Overview

Kill Bill supports the ability to generate emails and invoices in various languages as long as the required translation files are present in the system. Three tabs on the Tenant Configuration page enable you to upload these files:

- Invoice Template
- Invoice Translation
- Catalog Translation

The screenshot shows the Tenant Configuration page with five tabs: 'Catalog Show', 'Overdue Show', 'Invoice Template', 'Invoice Translation', and 'Catalog Translation'. The 'Invoice Template', 'Invoice Translation', and 'Catalog Translation' tabs are highlighted with a red box. Below the tabs is a file upload section with a 'Choose File' button, the text 'No file chosen', a checkbox for 'Manual Pay', and an 'UPLOAD' button.

The functionality of these tabs is very similar. To avoid repetition, we've included instructions for just one tab, with any differences noted.

Additional Translation Resources

- [Invoice Templates](#)
- [Email Notification Plugin](#)
- [Internationalization](#)

View Translation Tabs

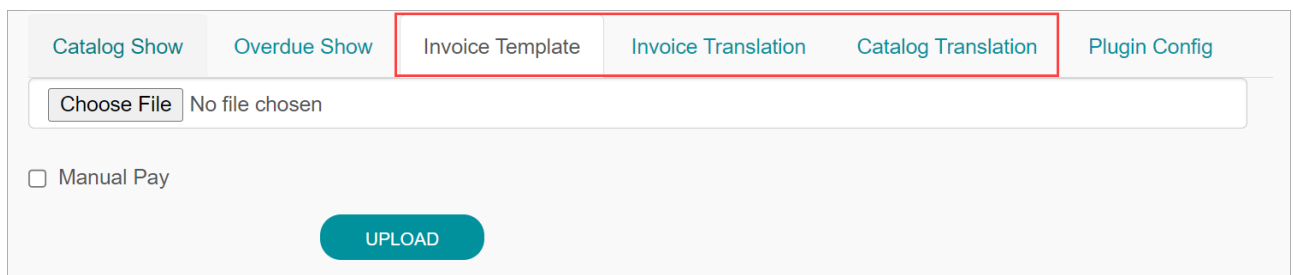

To get there:

1. Click on your username and tenant name in the upper right corner:

Kaui displays the Tenant Configuration page.

2. Scroll down to see the translation tabs:

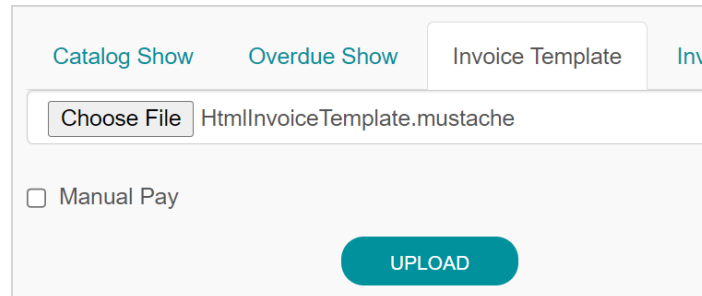

This screenshot is identical to the one above, showing the Tenant Configuration page with the 'Invoice Template', 'Invoice Translation', and 'Catalog Translation' tabs highlighted by a red box.

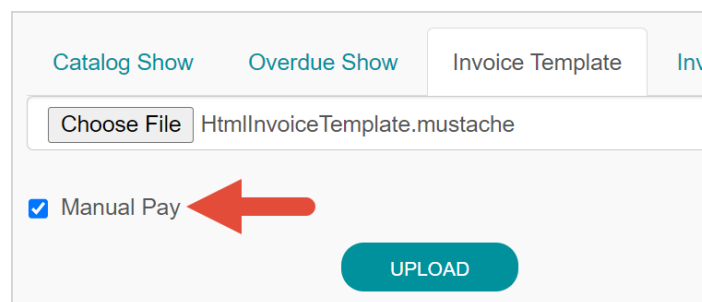

Upload a Translation File

1. [Go to the Tenant Configuration page](#) and scroll down to the translation tabs.
2. Select the appropriate translation tab for the file you want to upload.
3. Click the **Choose File** button, locate the translation file, and select it.

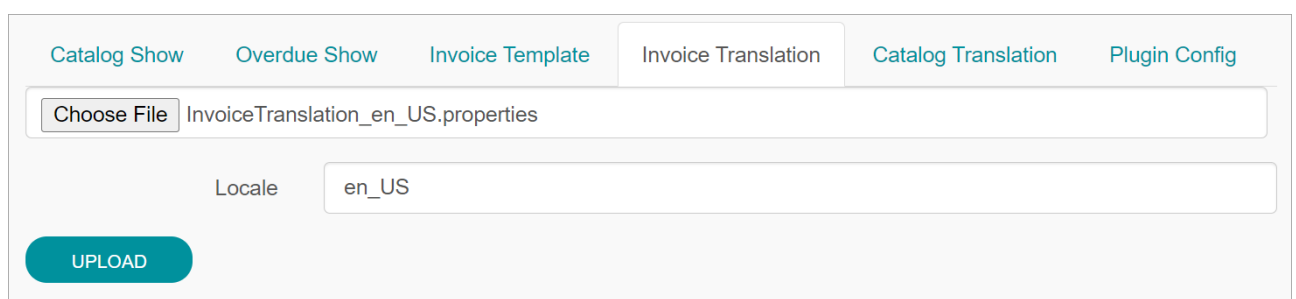

Once you have selected the file, Kauai displays the filename next to the **Choose File** button.

4. *For Invoice Templates only:* If this invoice template supports the manual pay option (for accounts that have the **MANUAL_PAY** tag), select the **Manual Pay** checkbox. (For more information, see the ["Templates"](#) section of the API.)

5. *For Invoice Translation and Catalog Translation only:* In the **Locale** field, specify the language supported by the uploaded file using the ISO *country_language* format.

6. Click the **Upload** button.

If the upload is successful, Kauai displays a success message at the top of the screen and lists the file on the tab. ^^I'm assuming this is what happens, but I received a Cloudflare error when I tried to upload.
